

Users of both short and long action Remington™ 700 rifles can now benefit from the Accuracy International Chassis System (AICS) stock, based on that used for the world's premier sniper rifles: the Accuracy International AE and AW series.

**Short action calibres:** .243win / .308win / 7mm-08 / 22-250

**Long Action calibres:** 7mm magnum / .300 winmag

*Please note: an AICS kit will enhance the performance and durability of a rifle over a standard wooden stock. It will not match the performance of a purpose built professional sniper rifle such as the Accuracy International AE or AW series.*

# AICS

(Accuracy International Chassis System)

upgrade kit for  
Remington™ 700

1 The full-length aluminium chassis gives the rifle a rugged, environmentally stable platform to enhance accuracy and zero retention. The action is attached to the stock by two bolts (supplied)\* and retained in a self-aligning vee block bedding system.

2 Designed to provide a secure grip and a repeatable shooting position in all conditions, the stock sides feature an integral raised cheek piece to correctly position the user's eye (see cover). Manufactured from polymer, they are impervious to all cleaners and lubricants normally used on small arms. Available in black or green.

3 Chassis kits come with a bolt on butt pad together with two spacers, one of 0.4ins (10mm) and the other of 0.8ins (20mm).

4 One Accuracy International designed five shot detachable steel magazine is included. It improves feeding and is quicker to reload than a floor plate design.

5 Four sling swivel attachment points, two per side are fitted enabling the rifle to be carried flat against the back for added comfort.

6 The chassis has integral fixing points for bipods to suit both Accuracy International and Harris™ designs.

Polymer stock sides ghosted to show full length aluminium chassis beneath

6 **Optional folding stock:** reduces overall length by 8ins (210mm) when folded and adds 0.4lb (0.2kg). Ideal for rapid deployment from a vehicle, the stock locks in the folded position for security and to avoid noise. Released by simply pulling on the butt, the wear compensated hinge ensures total rigidity in the extended position.

7 **Optional adjustable cheek piece:** adjusts left/right as well as for height to obtain optimum cheek position when using night vision equipment or telescopic sights with large objective lenses.

AICS upgrade kits	Stock type	Stockside type	Cheekpiece type	Short action Part No.	Long action Part No.
Stage 1	Straight	Green	Fixed	2956	3903
	Straight	Black	Fixed	3754	3521
Stage 1.5	Straight	Black	Adjustable	3757	4405
	Straight	Green	Adjustable	3756	3904
Stage 2	Folding	Green	Adjustable	3217	4406
	Folding	Black	Adjustable	3755	3523

\*See your rifle handbook or dealer for the fixing bolt torque settings.

## Accessories

Butt spacers: 0.4ins (10mm), 0.8ins (20mm) and 1.6ins (40mm) thickness. Fit in any combination to adjust stock length.

Target butt pad: allows butt height and angle to be adjusted to suit the user.

10 shot magazine (short action model only).

AI Bipod with quick release spigot. Catches on extendable heavy duty legs help avoid noise when stalking.

Standard sling: for carrying and single point shooting. Available in black or green.

Biathlon sling: extra comfortable carrying position - also helps conceal rifle under clothing for covert operations. Black only.

Specialists in the tactical market for over twenty years, Accuracy International has a reputation for building military bolt action rifles of the finest quality. Our weapons are in service with government forces in 50 countries.

**Quality System**  
Accuracy International's quality system is certified to BS EN ISO 9001:2000.
